

algorithms in algebraic geometry pdf

In geometry, a simplex (plural: simplexes or simplices) is a generalization of the notion of a triangle or tetrahedron to arbitrary dimensions. Specifically, a k -simplex is a k -dimensional polytope which is the convex hull of its $k + 1$ vertices. More formally, suppose the $k + 1$ points v_0, \dots, v_k are affinely independent, which means $v_1 - v_0, \dots, v_k - v_0$ are linearly independent.

Simplex - Wikipedia

Linear programming (LP, also called linear optimization) is a method to achieve the best outcome (such as maximum profit or lowest cost) in a mathematical model whose requirements are represented by linear relationships. Linear programming is a special case of mathematical programming (also known as mathematical optimization).. More formally, linear programming is a technique for the ...
