

spectrometric identification of organic pdf

Spectrometric Identification of Organic Compounds is written by and for organic chemists, and emphasizes the synergistic effect resulting from the interplay of spectra. This text is characterized by its problem-solving approach with numerous practice problems and extensive reference charts and tables.

Tables of ^1H and ^{13}C NMR resonances for common organic contaminants are reported in 12 different deuterated organic solvents frequently used to study organometallic systems. This manuscript catalogs the chemical shifts for nearly 60 gases and organic compounds which are commonly used as reagents or internal standards or are found as products in organometallic reactions.
